PROFESSIONAL EXPERIENCE

Process Manager – Full Stack Engineering Lead

Jul 2024 – Present

eClerx | Remote (Mumbai, India)

- Lead a cross-functional team delivering web applications while contributing hands-on code in React, Next.js, Node.js and TypeScript.
- Own architecture decisions, code reviews and delivery standards across team projects.
- Translate stakeholder requirements into technical roadmaps, release plans and process documentation.
- Improve engineering and delivery processes, and mentor developers on modern JavaScript/TypeScript and AI-assisted development workflows.

Lead Software Engineer

Feb 2018 – Jul 2024

Sivana (ARC) | Remote (New Delhi, India)

- Led the engineering team end to end: project planning, resourcing, client meetings and hands-on full-stack development.
- Built and maintained the company's web product frontend in Next.js and Zustand against a PHP API.
- Migrated the company's highest-traffic websites to AWS (EC2, Lightsail) and improved response times with Varnish, Memcached and APC caching.
- Partnered with sales and marketing teams to deliver technical solutions for new client challenges and digital campaigns.
- Introduced scalable technologies and deployment practices to support business growth.

Senior Software Engineer

Jun 2017 – Feb 2018

Incedo Inc. | Gurugram, India

- Led development of Magento Community e-commerce projects, improving UI/UX and mobile responsiveness.
- Delivered Magento storefront work for ONE Championship, a global sports media brand.
- Integrated Facebook, Twitter and other social login APIs.
- Gathered requirements and feedback directly from international clients.

Senior Web Developer

Jul 2015 – Jun 2017

Byte Matrix Pvt. Ltd. | New Delhi, India

- Delivered client websites and web applications on PHP, Magento and WordPress, from requirements to launch.
- Integrated payment gateways including Stripe, PayPal, Authorize.net, WorldPay, eWay, HDFC and Axis Bank.

- Built Dealighted, a deals platform for Omantel users in Muscat, adding a custom payment gateway and hosting on AWS.
- Replaced and optimized the Magento store for Scentra; built Tour4Sports (sports travel booking) and a crop advisory database for the NGO Pragya.
- Led client meetings and resource planning.

Software Engineer

Feb 2013 – Jul 2015

Rishti India | New Delhi, India

- Built and maintained web applications in Core PHP, Magento, WordPress, Joomla, Drupal, OpenCart and PrestaShop.
- Led a team of 8 developers to deliver a Government of Uttar Pradesh local-elections web project, working directly with the Director of Local Bodies.

SELECTED PROJECTS

- **Legends League Cricket (Tech Partner):** Owned requirements, architecture and ongoing maintenance of the league's website and related applications.
- **SpeedMetrics:** Website performance report tool with Core Web Vitals, device and network profiles, run comparison and PDF export. Next.js 15, TypeScript, Tailwind CSS, Recharts; static deployment.
- **Web Tools Suite (khanamir.me/tools):** Resume builder, internet speed test PWA and IP checker built with Next.js, each deployed through GitHub Actions CI/CD.
- **HolidayHomeConcepts.com:** Christmas home-decor e-commerce application, developed solo in a record timeframe.
- **WPSPINS.com (Houston, TX):** Website Development Partner delivering web projects for US clients.
